WORK EXPERIENCE

AI Transformation Specialist | Sharon Co., Ltd.

Jun 2026 - Aug 2026

Hands-on ownership of validation, reconciliation, integration, and operational delivery

- Reconciled AI counts against physical counts for a 50-product catalog; built a 48-SKU validation checklist and flagged two products below current quality criteria.
- Standardized 27 visual classes into 37 business SKUs plus 13 foundation-only products, aligning model labels with KiotViet records.
- Investigated SKU/count discrepancies and implemented a human-review gate that blocked unconfirmed or duplicate inventory writes.

SELECTED PROJECTS

APAOMA - Commercial & Operational Performance Analysis

2026

Independent project | End-to-end analytics ownership | [GitHub](#)

- Analyzed 53 ad campaigns, 81 Facebook posts, paid promotions, financial statements, and inventory exports; rebuilt metric definitions and QA from raw data.
- Detected a 4.57% March revenue mismatch across source tables; validated inventory-flow identity and surfaced usage/revenue rising 41.6%→54.8% and ending-inventory/revenue 33.7%→104.3% as investigation signals.

DATATHON 2026 - E-commerce Business Analysis

Mar-Apr 2026

4-member team | Direct EDA + recommendation ownership | [GitHub](#)

- Performed EDA across acquisition/conversion, promotions, and inventory on 13 connected tables (646,945 orders); found sub-1% conversion, ~84% Outdoor overstock, and ~31% lower AOV for promoted orders.
- Directly wrote channel, cross-selling, purchasing, and safety-stock recommendations; reviewed/interpreted the teammate-built 548-day LightGBM-XGBoost forecast.

ViMUNCH - Vietnamese Metaphor Benchmark Data Pipeline

2026

Thesis 9.4/10 | 2-member team | [GitHub](#)

- Built collection/preprocessing components, Streamlit tooling, LLM-assisted pre-annotation, annotation/reviewer scoring, EDA, and stratified 5,950/850/1,701 splits for 8,501 records with 23 attributes.
- Co-developed thesis Chapters 1-3; final seven-LLM experiments were implemented by a teammate.
